

Safety and Security Fence Project

Creating a safe, purposeful space where young children can learn through play

164+

students served today

6w-10yr

ages served

400

square feet of new fence

THE NEED

Abilities First serves children with autism and other developmental disabilities through specialized education, one-to-one intervention, and occupational, physical, and speech therapy. Because children with autism are at increased risk of elopement and climbing behaviors, a secure outdoor environment is essential. Funding will support the replacement of our existing 4-foot chain-link fence with a 6-foot vinyl fence, creating a safer walkway and playground area for the children we serve.

THE PROJECT

We will tear out our existing 4' chain link fence surrounding the playground and replace it with a 6' vinyl privacy fence that will extend to the back door of the building securing both the playground and the walkway to the playground. The fence will be approximately 400' long and require several secured gates.

PROJECT BUDGET

Removal of the current fence
Installation of new posts
Installation of new vinyl fencing
Installation of gates
Miscellaneous

FUNDING OPPORTUNITY

\$30,000

total project investment

A funding partner can help create a lasting resource that supports safety, learning through play, movement, socialization, and therapy for children with autism and differing abilities.

WHY IT MATTERS

This project responds directly to our #1 priority – the safety of the children we serve. Your investment will help enhance safety, eliminate the possibility of elopement, and provide a clear boundary and privacy for our vulnerable students.

PARTNER WITH ABILITIES FIRST TO BUILD A NEW FENCE TO KEEP OUR CHILDREN SAFE!

Envision what it could look like...
